accomp. c. 2 from Presb. Church

Entered according to Act of Congress, in the year 1852, by B. Fallon, Secretary of the Tehuantepec Railroad Company of New Orleans, in the Clerk's Office of the District Court for the Eastern District of Louisiana.

CONTENTS.

MAPS.

No. 1.—Map of the Isthmus of Tehuantepec, embracing all the Surveys of the Engineering and Hydrographic Parties, and showing the proposed route of the Tehuantepec Railroad.

No. 2.—Plan of that part of the Isthmus of Tehuantepec, between the Jaltepec River and the Pacific Plains, embracing all the engineering difficulties on the route of survey.

No. 3.—Mouth of the Coatzacoalcos River.

No. 4.—Sketch from the mouth of the Coatzacoalcos River to the town of Mina-titlan.

No. 5.—Map of the Coatzacoalcos River from Mina-titlan to the Isla del Suchil, and of the Jaltepec River from its junction to the Railroad Crossing.

No. 6.—Map of the River Uspanapa to the Playa del Tigre; also Maps of Mina-titlan and a part of the Tancochapa River.

No. 7.—Chart of the Ports of La Ventosa and Salina Cruz.

No. 8.—Chart of the Entrance and Channel of the Boca Barra.

MOUTH

OF THE

COATZACOALCOS RIVER

SURVEYED JAN. 1848

by order of Com. M.C. Perry.

BY

Wm. Leigh	1st Lieut. U.S.M.	Officers
E. L. Nichols	4th Master	of the
C. D. Bradbury	Master's Mate	M. S. Brig Standish

High Water observed at full Moon, Jan. 20th 1848. 4 h. 30 m P.M. Extreme rise and fall, 3 feet.

Note. The soundings on this Chart are expressed in feet, and are reduced for Low Water, Spring Tides. The scale of this Chart would not admit of the 2 feet being expressed, so that the 2 feet which appear on the bar should be considered as 12 feet.

The Tides are very irregular except at the time of Full and Change of the Moon. At other times I have known them effect to remain for a week or more at half tide, so that except when the Moon is near the Full or Change, 13 or 14 feet may be expected on the bar with a [illegible] of certainty.

Excellent water may be obtained at all seasons of the year at either of the rivulets on the eastern bank of the river; that marked "Watering Place" is the most abundant, but it is rather difficult of access from the shallowness of the water; the others have rather more water in front of them. Water may also be had from the rivulet on the western bank, but not of so good a quality. — Wm. Leigh.

Latitude 18. 8. North.
